New Horizons

Mason bee cocoons hatched in the Apiary and were taken to their new **mason bee hotel homes** in the Community Garden. We learned how different this species is from the honey bee; which, by-the-way, are already storing honey preparing for the dearth of summer.

- Honey bees get all the attention because of their sweet honey; however, Mason bees pollinate up to 2,000 flowers every day because their entire bodies get coated in pollen; whereas, honey bees only gather pollen on their hind legs.
- One Mason bee does the work of 100 honey bees.

Green Thumb Tips

- **P**lant herbs: basil, rosemary, thyme, oregano, & dill
- **M**ulch tomatoes that are already planted
- **I**nstall automatic watering systems
- **P**rone rhododendrons, blooming has finished
- **P**lant more **VEGETABLES!!**
- **W**ork less ... Garden more

Greenhouse News

Redecorating in Progress

Come visit us and see all the many plants outside AND inside too. A huge variety of garden and flower bed plants are available for purchase— just in time for planting those warm weather veggies.

Community Garden News

We gave away seeds, plants & containers during our “Planting Kindness” event last month.

At our “Cut Flowers” event coming up we will learn the art of Cut Flowers; how to properly harvest, and ways to use them inside to decorate. Additionally we’ll find out which flowers are best for flower arrangements and why?

We’ll save you a seat ... this will be fun

Save the Date

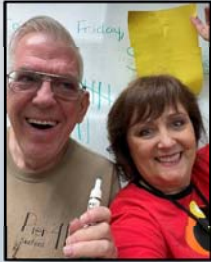

May 18th from 10:00 to 2:00

for our
Cut Flowers
event

Volunteers Needed ... and loved

We have many inside, outside, & digital opportunities available for you to help contribute to our mission

Math Wars are on ...

*Nothing like a bit of
friendly competition
to make
counting fun*
